

Cake Walk How TO

Place numbered squares on the floor in a big circle, number side up. Collect quarter from every person playing. (or one-time fee of \$1 from every one for chance at all cakes).

To start, each person stands on a square. Have the numbers of all squares in a basket. One person picks out the “winning” number (each time). When the music plays, each members walks from square to square. When the music stops, stand on the nearest square. The person on the winning square gets the cake.

The cake can be set on the altar each time, or all cakes can be set out and the winner choses.
